

Zarif Jurayev, Full-Stack (Go backend) Developer

Tashkent, Uzbekistan, +998919005242, zarifjurayev1999@gmail.com

PROFILE

Experienced Go Backend Developer (Kafka) with strong development experience. Proficient in using microservices architecture, Docker containerization, and asynchronous communication tools to build scalable and efficient systems. Skilled in database management, API development and deployment processes. Adept at collaborating in cross-functional teams, maintaining effective communication, and consistently delivering high-quality code. I'm happy to offer technical expertise and innovative solutions for success in dynamic software development projects.
